

# Meshes for Papermaking and Calcium Silicate Board Industries

TWC provides meshes for the papermaking and calcium silicate board (fiber cement board (FCB)) industries. In sheet-making process of papermaking, a cylinder is rotated in the raw material tank to form a fiber layer. TWC provides meshes that can be used as replacement parts (in the papermaking device) for use in this process. These products can be manufactured using custom materials and mesh standards, and we can also provide suggestions to help improve the specific papermaking processes of our customers.

## Uses

Papermaking, calcium silicate board (FCB), and other manufacturing processes

## Processing technologies

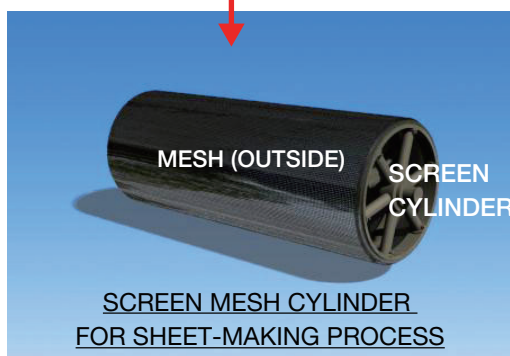

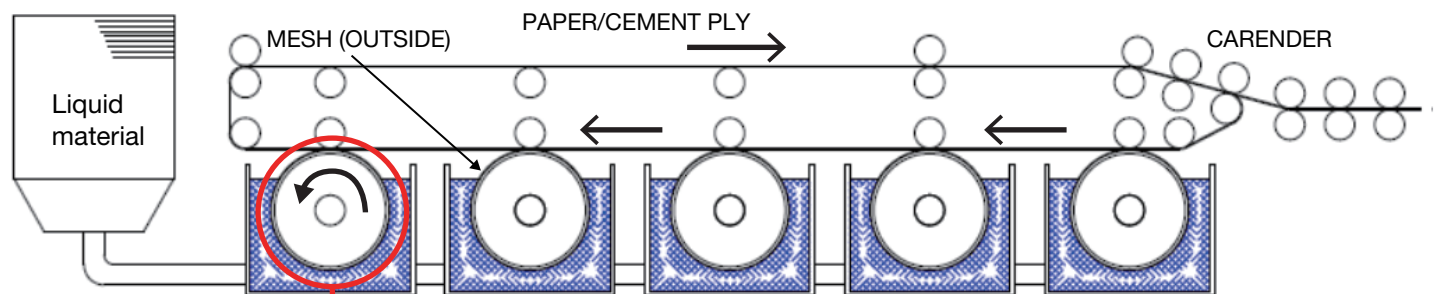

Netting, endless processing, and bias processing (such as 45-degree and 60-degree processing) requiring advanced techniques and superior quality control

## Standard examples

SUS-316/SUS-316L 8 MESH
SUS-316/SUS-316L 20 MESH
SUS-316/SUS-316L 40/30MESH
SUS-316/SUS-316L 80/56MESH
SUS-316/SUS-316L 100/70MESH

## Example mesh usages

### SHEET FORMATION PROCESS

## Our Worldwide Locations

**TWC** Taiyo Wire Cloth Co., Ltd.  
 1-11-7 MinamiSenba Chuo-ku, Osaka Japan 542-0081
